Definite Development

Mr. F. H. Brewster said he was part-
icularly gratified to attend the cere-
mony, because, following the work of
the pioneers, he was entrusted with the
job of carrying out the work conceived
by them. The schemes definitely
marked a stage in the development of
this great State. He believed there
were now wonderful opportunities for
future development and increased pop-
ulation in this territory. He stressed
the dangers of irrigation through in-
experience, and the benefits it could
assure if water was wisely applied. His
advice was to use a little rather than
too much water for the best results,
and the absolute necessity to make pro-
vision for proper drainage. He was
firmly convinced that the form of irri-
gation introduced in this part of the
State was the very best, and that no
district could surpass this in its pros-
pects for the future. He hoped that
all their anticipations would be real-
ised.

Water Turned On

The formal ceremony of turning
on the water from the adjacent
channel to spread over some prepared
land nearby, was then performed by
the Premier, and demonstrative
cheers were given by the spectators.

Vote of Thanks

A vote of thanks to the Premier and
Major Reid was moved by Mr. Leth-
bridge and supported by Mr. Lawson.
The presentation of a miniature Deth-
ridge water wheel was made to the
Premier by Mr. Lethbridge as a mem-
ento of the historic occasion.

At the invitation of Mr. T. P. Tay-
lor (agricultural instructor), the visit-
ors then watched with interest the op-
erations of a tractor in grading and
making check banks.
